

# 4 Stage System Post

## With Cam-Lock for securing handrail posts

The 4Stage System Post is part of a family of products from rostra Tops and Legs to Handrails. The steel securing Cam-Lock device is used in the lower part of handrail posts with quick and easy operation to give added security to removable handrails. There are two options, long and short, to provide the following benefits of:

- Easy Operation - Just x2-off Full Turns.
- End Stop - Cannot be over tightened.
- Up to 3kN handrails.
- Short Version - For no floor recess (for flat floor).
- Long Version - For recessed floor sockets.
- Architectural finish can be added to top of handrails.

Additional information: 4Stage Post Socket - 60x60x4 SHS x135mm long, see 4Stage Socket leaflet for further details.

See the full 4Stage System Leaflets for details of:

4Stage Top - Standard Rostra Tops

4Stage Legs - Adjustable Range

4Stage Handrail - Standard Handrail with Kickboard
